

Hand Held AP65 SERIES: Detailed below, the three sizes of applicators help to complete repetitive labeling in a fraction of the time that it takes to apply labels by hand. The durable, light-weight AP65 series of applicators are cost effective and easy to use with any type of die cut labels. A unique sensor automatically adjusts the label stroke so that operators can increase their productivity by simply squeezing the trigger and feeding one label that will then apply to virtually any surface.

Determining Your Needs:

The following specifications offer guidelines to use when selecting the appropriate dispenser for your needs. Please notice that OD refers to "Outer Dimension" of the roll, while ID refers to "Inner Dimension" of the core. "Label Repeat" indicates the distance from the beginning of one label to the beginning of the next label.
