

Cosmos[®] 612 Semi-Automatic Tabletop Tamp

The **Cosmos[®] 612 Tamp** is a semi-automatic machine that applies labels by tamping them onto one side of a product.

A Customized product fixture holds product in a precise location. This allows the **Cosmos[®] 612 Tamp** to deliver extremely accurate and reliable label placement.

The **Cosmos[®] 612 Tamp** is easy to use and the rugged design will provide years of service.

Features:

- Heavy duty aluminum construction for industrial applications
- Spring loaded pinch roller handle allows easy label loading
- Easily adjustable supply roll tension clutch
- Stainless steel peel edge for durability
- Rotary thumbwheel dials in desired feed length
- Rear powered waste retractor winds scrap liner out of operator's way and off the floor
- C-Eye Label detector (die-cut labels only)

Options:

- LCD Label Counter: Displays number of labels dispensed
- Programmable Counter: Allows unit to be stopped after preset number of labels
- Accepts hot stamp imprinter or ink coder for date, lot and batch labeling
- Clear Label Sensor
- Foot Pedal Activation Switch
